# Occupational Health and Safety Act

JULY 4, 1987

**MINISTRY OF LABOUR**  
**NOTICE OF PROPOSED AMENDMENTS**  
**REGULATION RESPECTING ASBESTOS**

Notice is hereby given of the following proposed amendments to the Regulation respecting Asbestos, O. Reg. 570/82 as amended by O. Reg. 655/85 and O. Reg. 23/87, made under the Occupational Health and Safety Act, R.S.O. 1980, c.321 (the Act).

The Regulation respecting Asbestos, which came into effect on August 20, 1982, was intended to serve as an interim regulation until The Royal Commission on Matters of Health and Safety Arising from the Use of Asbestos in Ontario (the Commission) submitted its report. In its final report in 1984, the Commission made recommendations concerning the regulation of occupational exposure to asbestos. Some of these recommendations were implemented in the Regulation respecting Asbestos on Construction Projects and in Buildings and Repair Operations, O. Reg. 654/85, and in the first amendment of the Regulation respecting Asbestos, both of which came into effect on March 16, 1986. The proposed amendments incorporate further recommendations of the Commission.

The following proposed amendments are based on the Commission's recommendations:

- o the prohibition of,
  - the mining of amosite and crocidolite,
  - the use of amosite and crocidolite in the manufacture of asbestos products, and
  - the establishment of a workplace for the spinning, braiding or weaving of any type of untreated asbestos yarn (section 4);
- o a requirement for an air monitoring statistical report (subsection 13(1));
- o the appointment of a competent person to supervise all air monitoring (subsection 8(3));
- o the appointment of a worker to observe air monitoring procedures (subsection 8(4));
- o technical changes to the Code for Measuring Airborne Asbestos Fibres; and
- o a provision in the control program for a training program for supervisors and workers (clause 8(2)(f)).

The following additional amendments are also proposed:

- o a redefinition of asbestos to clarify that the regulation does not apply to talc and other non-asbestos minerals (section 1);
- o the removal of clause 3(1)(c), under which certain repair, alteration and maintenance work was covered by the Regulation respecting Asbestos, O. Reg. 570/82, rather than the Regulation respecting Asbestos on Construction Projects and in Buildings and Repair Operations, O. Reg. 654/85; and
- o a requirement that air purifying respirators be equipped with high efficiency filters.

These latter proposed amendments will necessitate parallel amendments to the Regulation respecting Asbestos on Construction Projects and in Buildings and Repair Operations (O. Reg. 654/85).

In addition to the proposed amendments, the Ministry is studying the feasibility of lowering the exposure limits for asbestos other than crocidolite or amosite which will, in effect, be banned.

The government is committed to an open and consultative process for the development of designated substance regulations on the basis that this is more likely to result in quality regulations which are more understandable and acceptable to the affected parties. The Ministry welcomes comments on the proposed amendments. Comments must be submitted by October 2, 1987, to:

**PROPOSED AMENDED

(3) Upon advising the employer and the worker that a worker, because of a condition resulting from exposure to asbestos, is fit with limitations or unfit for work in an asbestos exposure, the physician shall advise in writing, upon a confidential basis, the joint health and safety committee thereof and in giving such advice shall indicate his opinion as to the interpretation to be placed thereon.

(4) Copies of the exposure records and the records and results of physical examinations and clinical tests of a worker shall be given by the physician conducting the examinations or tests,

(a) to the worker or his physician upon the request in writing of the worker, and

- (b) in the case of a deceased worker, to the next of kin or personal representative of the worker, upon the request in writing of such next of kin or personal representative,

and any authorization of another person by the worker or the worker's next of kin or personal representative is of no effect.

For the purposes of this Regulation, the methods and procedures that may be used or adopted may vary from the Codes issued by the Ministry if the protection afforded thereby or the factors of accuracy and precision used or adopted are equal to or exceed the protection or the factors of accuracy and precision in the Codes issued by the Ministry.

19. (1) This Regulation, except sections 4, 5, 6, 8, 9 and 11 to 18 comes into force on the day this Regulation is filed with the Registrar of Regulations.

(2) Sections 4, 5, 6, 8, 9 and 11 to 18 come into force ninety days after the day this Regulation is filed with the Registrar of Regulations.

#### SCHEDULE

The time-weighted average exposure of a worker to airborne asbestos shall be calculated for a forty hour week and an eight hour day as follows:

1. The average concentrations of asbestos to which a worker is exposed shall be determined from analyses of air samples taken as being representative of the exposure of the worker to asbestos during work operations as set out in the Code mentioned in section 12.
2. The results of the analyses are the concentrations of asbestos expressed as the number of fibres per cubic centimetre of air.
3. The concentrations shall be multiplied by the time in hours to which the worker is taken to be exposed to such concentrations.
4. The weekly exposure shall be calculated as follows:

$C_1T_1 + C_2T_2 + \dots + C_nT_n$  = cumulative weekly exposure, where  $C_1$  is the concentration found in an air sample and  $T_1$  is the total time in hours to which the worker is taken to be exposed to concentration  $C_1$  in a week.

5. The weekly time-weighted average exposure shall be calculated by dividing the cumulative weekly exposure by 40.
6. The daily exposure shall be calculated as follows:

$C_1T_1 + C_2T_2 + \dots + C_nT_n$  = cumulative daily exposure, where  $C_1$  is the concentration found in an air sample and  $T_1$  is the total time in hours to which the worker is taken to be exposed to concentration  $C_1$  in a day.

7. The daily time-weighted average exposure shall be calculated by dividing the cumulative daily exposure by 8.

CODE FOR MEASURING  
AIRBORNE ASBESTOS FIBRES

MINISTRY OF LABOUR  
OCCUPATIONAL HEALTH AND SAFETY DIVISION

June 30, 1987

SAMPLING METHOD FOR AIRBORNE ASBESTOS FIBRES\*1. Principle of the Method

Air possibly containing asbestos fibres\*\* is drawn through a cellulose ester filter of specified pore size held in an open-faced holder. A randomly selected section of the sample filter is then mounted on a microscope slide to which a drop of mounting solution is added. The filter portion is transformed from an opaque, solid membrane to an optically transparent, homogeneous gel. The slide is then mounted on a microscope stage and the fibres are counted at 400 to 450 times magnification by a specified procedure. The average number of fibres counted per field of view of the microscope is used to calculate the concentration of airborne fibres.

2. Equipment

The equipment required to obtain a sample and to perform an analysis for airborne fibres must include the following components and satisfy the criteria outlined below:

## (1) Sampling Equipment

- (a) A battery operated, portable pump which must:

- (i) be capable of delivering for a full work-shift, 2 or more litres of air per minute; the maximum deviation from the prescribed flow rate must not exceed  $\pm 5\%$  and the pump should be equipped with a pulsation damper;

- (ii) be intrinsically safe when necessary, i.e., be certified by an accepted agency as safe for use in potentially explosive atmospheres;

- (iii) include a calibrated flow meter, volume meter or a mechanism for maintaining a prescribed flow rate;

- (iv) have an on-off switch and flow rate control mechanism which are as tamper-proof as possible.

- (b) A 37 millimetre inner diameter filter holder which is:\*\*\*

- (i) capable of being used for open-faced sampling;
- (ii) equipped with an adapter which provides a leak-proof fit for connecting flexible tubing.

- (c) Cellulose ester membrane filters, certified to be fibre-free, 37 mm in diameter and 0.8 micrometres ( $\mu\text{m}$ ) in pore size.

- (d) Cellulose filter support pads, 37 mm in diameter.

- (e) A sufficient length of flexible polyethylene tubing with appropriate wall thickness to prevent it collapsing when air is drawn through and with appropriate inner

\* This method may also be used for area sampling at strategically selected locations by placing a sampling unit on a suitable support in the same manner as it would be placed on a worker.

\*\* Refer to the Regulation for the definitions of "asbestos" and "fibre".

\*\*\* See Appendix Two.

diameter which will provide a leak-proof connection to the filter holder adapter and to the inlet port adapter of the portable pump.

## (2) Analysis Equipment

- (a) An optical microscope with the following features:

- (i) a binocular head;
- (ii) 10x Huygenian or equivalent eye piece;
- (iii) illumination with adjustable intensity;
- (iv) Patterson Globe and Circle reticle;
- (v) a mechanical stage;
- (vi) a phase contrast condenser with a numerical aperture, equal to or greater than that of the objective;
- (vii) 40-45x phase contrast achromatic objective with a numerical aperture between 0.65 and 0.75;
- (viii) a phase ring centering telescope or Bertrand lens;
- (ix) a stage micrometer with 0.01 mm subdivisions.

- (b) Glass microscope slides having 2.5 x 7.5 cm dimensions with one end frosted.

- (c) Coverslip for covering the filter on the microscope slide (2.2 x 3 cm and about 0.17 mm thick).

- (d) Scalpel for cutting wedge-shaped portions from the filter.

- (e) Fine-tipped tweezers for handling the filter.

- (f) Mounting solution for preparation of the sample, made by mixing dimethyl phthalate and diethyl oxalate in the 1:1 ratio by volume. To this solution, 0.05 grams of

cellulose ester filter per millimetre are added. Stir gently with a clean glass rod. Allow the mixture to stand until a homogeneous solution with a refractive index of approximately 1.47 is obtained. The solution must be discarded after three months or when it becomes turbid. A fresh solution must then be made. The reagents used must be reagent grade, free of particles and colour and conform to the specifications of the American Chemical Society Committee on Analytical Reagents.

## 3. Sampling Procedure

### (1) Preparation of Pumps

- (a) The pump battery pack must be fully charged before use in any work shift. If air sampling is carried out for more than one shift on the same day, a fully charged battery pack must be substituted for the used one.

- (b) Flow meters, volume meters or constant flow devices on the pumps must be calibrated at 2.0 litres per minute (L/min) by using a primary standard, such as a bubble meter, and the procedure recommended in the manufacturer's instructions for using the primary standard apparatus, with a representative filter holder and membrane filter in line:

- (i) after not more than 40 hours of operation;

- (ii) after receiving unusually harsh or potentially damaging treatment;

- (iii) after being disassembled for maintenance.

## (2) Preparation of Filter Holders

- (a) Assemble the filter holders in a clean environment prior to the initiation of sampling.
- (b) Prepare each filter holder by the following procedure:
  - (i) use only clean filter holders and handle the support pad and filter with tweezers. Place a filter support pad and a cellulose ester filter in the base of the holder;
  - (ii) plug the outlet and inlet ports;
  - (iii) ensure that the joints of the filter holder are sealed with non-porous, shrinkable cellulose band or tape.

## (3) Sampling

- (a) Assemble the sampling train by fixing one end of the flexible tubing to the inlet port of the pump and the other end to the adapter on the outlet port of the filter holder.
- (b) Check for air leaks in the sampling train by turning on the pump and inserting a clean plastic plug into the inlet port of the filter holder. The flow indicator on pumps with flow or volume meters must drop to the zero position and oscillate slightly. If this does not occur, find the leak and either repair the air leak if possible, or replace the faulty component.
- (c) Label the filter holder with an appropriate sample number.
- (d) Attach the pump to the worker's belt preferably or place it in his pocket, place the flexible tubing

over the shoulder and clip the filter holder to the clothing as near as possible to the breathing zone, with the inlet port of the filter holder facing downward. Ensure that the equipment will not interfere with the worker's movements.

- (e) Check that all equipment is properly assembled, remove the face portion of the filter holder, so that open-faced sampling can be performed and switch on the pump. Allow the flow rate to stabilize for a short duration, then adjust the rate to the pre-calibrated mark of 2.0 litres per minute. Pumps with constant flow devices must not be reset after the flow rate control mechanism has been adjusted to deliver air at this rate. A calibrated external flow meter may be used to check the airflow rate.
- (f) Note the following information for each sample:
  - (i) date of sampling;
  - (ii) company name;
  - (iii) model and serial number of the sampling pump;
  - (iv) calibration date of the sampling pump;
  - (v) name of worker;
  - (vi) job title;
  - (vii) sample number on the filter holder;
  - (viii) air flow rate;
  - (ix) time of initiation of sampling.
- (g) Ensure that for sampling performed during any particular survey, two control or blank filters are prepared in the same manner as the sample filters. These filters must remain in sealed holders during the sampling (i.e., no air is to be drawn through these filters). Label these as blanks and send along with the samples for analysis.

- (h) To estimate an optimum sampling duration for obtaining statistically reliable fibre counts, consideration must be given to microscope count field area, pump flow rate, estimated concentrations of airborne fibres, counting rule ranging from 20 to 100 fields and adequate fibre density to yield a minimum count of 0.1 fibre per field and background airborne particulate level (Ref. NIOSH Manual of Analytical Methods, Vol. 1, page 239-1). An optimum fibre density of about 1 to 5 fibres per field is suggested to minimize the counting errors. In order to evaluate the concentrations of airborne fibres in a work place, it is suggested that both long and short duration samples be taken. In this way, if long duration samples are too populated with fibres to count, the short duration ones can be used to calculate the actual fibre concentration. The following formula may be used to estimate the maximum sampling duration per air sample taken.

$$t = \frac{f \times A}{F \times a \times C \times 1000} \text{ minutes}$$

where t = maximum sampling duration per air sample taken

f = number of fibres/field desired

A = effective collecting area of filter, mm<sup>2</sup>

a = microscope field area, mm<sup>2</sup>

C = estimated fibre concentration, fibres/cm<sup>3</sup>

F = flow rate of the sampling pump, litres per minute

- (i) Sufficient number of samples should be taken to obtain a time-weighted average concentration. This sampling time may or may not include lunch breaks, depending on the nature of the work exposure to be measured. The individual air samples taken during the selected

periods are to be representative of the worker's exposure.

- (j) In order to evaluate the maximum concentration for any short period, several air samples must be taken over 15 minute durations when the peak concentrations of airborne asbestos are expected.
- (k) During the sampling interval, the equipment must be checked periodically to ensure that it is functioning properly. The air flow rate should not be re-adjusted after the initial flow rate is set. If the flow rate changes significantly, terminate sampling and take another sample.
- (l) The ambient air temperature and pressure in the sampling area, if required, should be recorded at least once.
- (m) To terminate sampling, perform the following sequence of steps:
- (i) check the air flow rate just prior to termination of sampling;
  - (ii) record the time of termination of sampling;
  - (iii) switch off the pump and carefully remove the sampling train from the worker;
  - (iv) remove the filter holder, replace the face portion of the holder and insert clean plastic plugs into the inlet and outlet ports;
  - (v) pack the filter holders in a rigid container with sufficient soft packing material to prevent crushing and transference of vibrations to the

filter during transport to the laboratory.

#### 4. Fibre Counting Procedure

##### (1) Microscope Adjustments

- (a) Follow the manufacturer's instructions and also the following:

- (i) Adjust the light source for even illumination across the field of view at the condenser iris;

Note: Kohler illumination is preferred, where available.

- (ii) Focus on the particulate material to be examined;

- (iii) Make sure that the field iris is in focus, centered on the sample and open only enough to fully illuminate the field of view;

- (iv) Use the telescope ocular supplied by the manufacturer to ensure that the phase rings (annular diaphragm and phase-shifting elements) are concentric.

- (b) Check the phase-shift detection limit of the microscope periodically.

- (i) Remove the HSE/NPL phase-contrast test slide from its shipping container and centre it under the phase objective.

- (ii) Bring the blocks of grooved lines into focus.

Note: The slide consists of seven sets of grooves (ca. 20 grooves to each block) in descending order of visibil-

ity from sets 1 to 7. The requirements for asbestos counting are that the microscope optics must resolve the grooved lines in set 3 completely, although they may appear somewhat faint, and that the grooved lines in sets 6 and 7 must be invisible. Sets 4 and 5 must be at least partially visible but may vary slightly in visibility between microscopes. A microscope which fails to meet these requirements has either too low or too high a resolution to be used for asbestos counting.

- (iii) If the image quality deteriorates, clean the microscope optics and if the problem persists, consult the microscope manufacturer.

##### (2) Calibration of the Area of the Microscope Field of View

- (a) The Patterson reticle must be calibrated with a stage micrometer. Each combination of eye piece and objective used with the reticle must also be calibrated at least once:

- (i) when the microscope is first received;

- (ii) when new objectives or eye pieces are installed;

- (iii) after the microscope has received a major servicing.

- (b) Follow the procedure below to perform a proper calibration of the area of the reticle:

- (i) With a 10x objective in the microscope, place the stage micrometer on the mechanical stage, focus on the millimetre scale and centre the image.
- (ii) Change to the 40x objective and adjust the first millimetre scale division to coincide with the left boundary of the Patterson Globe and Circle reticle.
- (iii) Read the micrometer position best coinciding with the right boundary of the reticle. Estimate any portion of the final division. This measurement represents the length (L) of the reticle.
- (iv) Give a 90° rotation to the eyepiece (with reticle) and adjust the first millimetre scale division to coincide with the left boundary of the Patterson reticle.
- (v) Read the micrometer position best coinciding with the right boundary of the reticle. Estimate any portion of the final division. This measurement represents the width (W) of the reticle.
- (vi) Calculate the area (a) of the reticle,  
$$a = L \times W \text{ mm}^2$$

- (vii) Calculate the circle diameters. The #25 circle diameter is 0.1 x (reticle length). The circle diameters are proportional to the ratio of their numbers. Thus the #20 circle diameter is 20/25 or 0.8 times the #25 circle diameter.

**Example:** If length = 0.112 mm and width = 0.051 mm Microscope Field Area =  $0.112 \times 0.051 = 0.0057 \text{ mm}^2$

Circle No.	Diameter (µm)
25	11.2
20	8.95
15	6.72
12.5	5.60
10	4.48
8	3.58
6	2.69
4	1.79

(3) Preparation of Slides \*

- (a) Perform all work in a clean environment. Clean slides, cover slips and all tools with lens tissue and lay slides on a clean surface with frosted end facing upward.
- (b) Label the frosted glass part of the slide with the same sample number as the filter holder containing the sample filter.
- (c) Using a glass rod, stir the mounting solution vigorously to ensure homogeneity, apply a drop to the centre of the slide and spread this solution

\* If it is desirable to prepare sample slides for repeated fibre countings over an extended period for the purposes of quality control and interlaboratory comparison, the acetone/triacetin method as described in the NIOSH method 7400, AIA or the proposed ISO method should be used.

**WARNING**

Sample mounting by the acetone/triacetin method must be carried out only in a fume hood or fume cupboard. On no occasion must it be used in the vicinity of an open flame.

into the approximate shape and size of the wedge cut from the sample filter.

- (d) Disassemble the holder to expose the filter and make two cuts from the centre of the filter to the perimeter. The wedge cut is to be approximately one-eighth of the total surface of the filter.
  - (e) Transfer the wedge to the solution on the slide, exposed side facing upward, with clean tweezers.
  - (f) Carefully place a cover slip over the wedge. Do not press or reposition the cover slip once contact with the solution has been made.
  - (g) Slides must be left for at least one hour after preparation, before the counting begins. If counting is not completed within 48 hours, the slide must be discarded.
- (4) Counting of Fibres on the Slides\*
- (a) Position the slide on the mechanical stage with the centre of the wedge under the objective lens and focus on the sample.
  - (b) Move the slide to a position near one side of the wedge and select a random field of view, i.e., the area of the reticle, by looking away from the microscope and advancing the slide in one direction with the mechanical stage control.
  - (c) Use the fine focus adjustment to scan different focal planes of the filter surface to obtain an accurate count in each field of view.
  - (d) Use the following criteria for counting of fibres for each field of view:
    - (i) avoid counting fields on the edge of the filter;
    - (ii) if a mass of material covers a significant portion of the field of view, reject the field and select a new one. Do not use the discarded field in the calculation;
    - (iii) if the filter is too heavily loaded with fibres, i.e., more than twenty-five fibres are present in each field of view, do not count this filter and use only those samples obtained over short durations, if possible, to obtain estimates of the fibre concentration;
    - (iv) count only those fibres with an aspect ratio of 3:1 or greater, with a length greater than 5  $\mu\text{m}$ , and with a diameter smaller than 3  $\mu\text{m}$ ; use the calibrated circles of the reticle to estimate the length and diameter of fibres; measure curved fibres along the curve to estimate the total length;

\*

1. Where there is an exposure to different kinds of asbestos fibres or asbestos and other non-asbestos fibres, the filters must also be analyzed by other techniques such as electron microscopy, x-ray diffraction, etc., to identify each kind of asbestos fibre present by comparing physical and chemical properties with those of the reference asbestos materials listed in Appendix One and with the properties listed in Appendix Three and to determine its percentage.
2. The pictorial drawings of single fibres, split fibres, grouped fibres and fibres with other particles as illustrated in Appendix H of the AIA method may serve as a useful reference for recognizing the various physical dimensions and forms of asbestos fibres likely to be seen microscopically.

- (v) count a fibre positioned entirely within the borders of the field of view as one fibre;
  - (vi) count a fibre with one end outside the field of view as half a fibre and do not count a fibre with both ends outside the field;
  - (vii) a bundle of fibres is counted as one fibre unless both ends of the bundle can be clearly resolved.
- (e) Record the total number of fibres in each field of view.
- (f) Select a new field of view by repeating part (b); when the opposite side of the filter has been reached, advance the other directional control of the mechanical stage and follow a path roughly parallel with the first series of field selected. Following this zig-zag pattern maximizes the area of the filter covered.
- (g) Stop counting only when a minimum of 20 fields containing 100 or more fibres have been counted, or when a total of 100 fields have been counted.

#### (5) Quality Control on Counting and Preparation

- (a) Count the blank filters first; if these blanks contain more than 3 fibres in 50 fields of view, investigate the sources of contamination and repeat air sampling.
- (b) One sample in every twenty or one sample per batch, whichever is less, selected at random, must be recounted by the same person. If the per cent difference between the two counts is greater than 30%,

then two additional samples from the batch must be recounted. If these two also show a variation greater than 30%, then all samples in the group of twenty or the batch must be recounted, and the mean results of the two separate counts must be reported for this group of samples. (Note: If the difference is greater than 60% on these samples, then the sampling must be repeated.)

- (c) One sample in every twenty or one sample per batch, whichever is less (i.e., not the same sample as selected for recounting), selected at random, must be reprepared from a freshly cut section of filter and recounted by the same counter. If the difference between the two counts is greater than 50% then two additional samples from the batch must be recounted. If these two also exhibit a difference greater than 50%, then all samples in the group of twenty or the batch must be recounted, and mean results of the two separate counts must be reported for this group of samples.

#### (6) Calculation of Results

Results of mean fibre count per field of view can be converted to concentration of asbestos fibres in the air sample by using the following equation:

$$C = \frac{855 \times (A-B)}{1000 \times T \times F \times a}$$

where C = the airborne fibre concentration in units of fibres per cubic centimetre

A = the total number of fibres counted per wedge divided by the total number of fields of view observed

B = the mean of the total number of fibres counted per wedge on the blank filters divided by the total number of fields of view observed

855 = the collecting area of the filter for a 37 mm diameter filter with an effective diameter of 33 mm in  $\text{mm}^2$

1000 = the factor for converting litres to cubic centimetres

T = sampling duration in minutes

F = flow rate of the sampling pump, litres per minute

a = the area of the field of view of the microscope in  $\text{mm}^2$ .

Note: Correct the volume of air sampled for pressure and/or temperature variations if necessary.

(7) Sufficient Area Samples Must Also Be Taken at All Work Locations.

(8) Limitation

In a work place atmosphere known to contain asbestos, all fibres with a length to diameter ratio of 3 to 1 or greater, and a length greater than 5 micrometres and a diameter smaller than 3 micrometres are, in the absence of other information, considered to be asbestos fibres and counted as such.

**APPENDIX ONE -- ASBESTOS REFERENCE MATERIAL**

The following are the asbestos reference materials that can be used for the identification of asbestos:

- (1) UICC\* Chrysotile;
- (2) UICC Anthophyllite;
- (3) Tremolite M37789 (kindly provided by Dr. F. Wicks of the Royal Ontario Museum);
- (4) Actinolite M30871 (as above from the Royal Ontario Museum).

\*NOTE: Timbrell, V. Characteristics of International Union Against Cancer (UICC) Standard Reference Samples of Asbestos; pp. 28-36, Proceedings of the International Conference on Pneumoconiosis, Johannesburg, 1969.

**APPENDIX TWO**

Alternatively, 25-mm filters and filter assemblies can be used as long as the appropriate adjustments are made particularly for filter collecting area and wedge cut size.

**APPENDIX THREE - METHOD FOR THE DETERMINATION OF ASBESTOS FROM BULK SAMPLES****1. Principle of Method**

- (1) Bulk samples, approximately 5 to 10 grams, are obtained from materials such as insulation, tiles or other materials suspected of containing asbestos.
- (2) Portions of the sample are examined under a petrographic microscope. Asbestos is identified by the fibrous morphology and optical properties and classified as being (1) chrysotile, (2) crocidolite, (3) amosite or (4) other amphibole asbestos. The latter includes tremolite, anthophyllite and actinolite.
- (3) A representative portion of the sample is analyzed by X-ray diffraction to help confirm the presence of serpentine and/or amphibole minerals when there is doubt as to the identity or classification of the sample.

**2. Apparatus**

- (1) Resealable plastic bags or containers to hold the samples.
- (2) X-ray diffraction equipment.
- (3) Sample holders for X-ray equipment.
- (4) Mortar and pestle.
- (5) A pair of tweezers with fine-pointed tips.
- (6) A petrographic microscope capable of magnifications up to 450 times and equipped with polarizer, analyzer, gypsum compensator and accessories for dispersion staining.
- (7) Glass microscope slides.
- (8) Glass coverslips for microscope slides.

3. Reagents

- (1) Immersion oils, such as Cargille oils, with refractive indices ranging from 1.52 to 1.70.

4. Procedure

- (1) The bulk sample is examined and representative portions are taken by means of tweezers.
- (2) If necessary, a portion of sample is crushed using the mortar and pestle.
- (3) All sample preparation should be conducted inside a fumehood.

(4) X-Ray Diffraction Analysis

- (a) The sample is mounted in the sample holder and analyzed using X-ray diffraction by scanning over the 2-theta range of approximately 9° to 40° if a cobalt X-ray source is used.
- (b) The d-spacings of the peaks present are calculated and compared to those listed in Table 1 which have been published by the Joint Committee On Powder Diffraction Standards (Selected Powder Diffraction Data for Minerals, 1st Ed., 1974).

(5) Microscopic Analysis

- (a) Using tweezers, a portion of the sample is placed in an appropriate immersion oil on a glass microscope slide and covered with a coverslip.
- (b) Using magnifications from approximately 60X to 450X the sample is

examined for the appropriate optical properties listed in Table 1.

- (c) The microscopic examination\* is repeated as necessary to estimate the amount of asbestos present in the bulk sample.

5. Calculations

- (1) The Occupational Health Laboratory uses an X-ray tube with a cobalt target. The d-spacings of the X-ray peaks are calculated from the 2-theta angle using the following equation:

$$d\text{-spacing in \AA} = \frac{1.7889}{2 \sin \left( \frac{2\text{-theta}}{2} \right)}$$

This equation will differ if another X-ray source (i.e., not cobalt) is used.

6. Range and Sensitivity

- (1) Fibres less than about 5 µm long and less than about 0.5 µm wide cannot be identified since they are smaller than the resolution of the light microscope.
- (2) Asbestos fibres in concentrations of less than about 5% may not be detected by means of the X-ray diffraction analysis.
- (3) Asbestos fibres in concentrations of less than approximately 0.5% may not be detected by means of light microscopic examination.

7. Presentation of Results

- (1) The following forms of asbestos are identified and reported individually: chrysotile, amosite, crocidolite,

\* If the fibres are small such that their optical properties cannot be determined, a portion of the sample is then processed for electron microscopic examination combined with X-ray energy dispersive analysis to determine the presence of asbestos.

amphibole asbestos (excluding crocidolite and amosite).

- (2) The amount of asbestos, by volume, is estimated by the area it occupies relative to that occupied by all the particulate matter on the microscope slide and is reported as one of the following:

(a) none detected (detection limit 0.5%)

(b) less than 1%

(c) 1% to 5%

(d) 5% to 25%

(e) 25% to 50%

(f) 50% to 75%

(g) more than 75%

#### 8. Interferences

- (1) Minerals of the serpentine and amphibole groups exhibit the same X-ray diffraction patterns as chrysotile and amphibole asbestos, respectively. Therefore, mineral fibres exhibiting the appropriate properties as listed in Table 1 must be found before asbestos can be confirmed as being in the sample.

- (2) Cellulose fibres and carbonates, if present in large quantities, may interfere with the analysis. The cellulose can be removed by ashing in a furnace at approximately 400°C for one hour. The carbonates can be removed by treatment with dilute hydrochloric acid.

CODE FOR MEDICAL SURVEILLANCE  
OF ASBESTOS EXPOSED WORKERS

MINISTRY OF LABOUR  
OCCUPATIONAL HEALTH AND SAFETY DIVISION

June 30, 1987

MEDICAL SURVEILLANCE PROGRAM1. Purpose

The objective of a medical surveillance program is to protect the health of workers by:

- (a) identifying workers with conditions which may be aggravated by exposure to asbestos and establishing a baseline measure for determining changes in health;
- (b) evaluating the effects of asbestos exposure on workers;
- (c) enabling remedial action to be taken when necessary;
- (d) providing health education.

2. Program

The medical surveillance program shall consist of the following:

- (a) pre-placement examinations;
- (b) periodic medical examinations;
- (c) clinical tests;
- (d) health education;
- (e) record keeping.

3. Medical Examinations

The examination shall include the following:

- (1) History: The initial medical and occupational history shall include enquiry for previous exposure to asbestos (both occupational and non-occupational), personal habits (smoking and hygiene), history of present or past gastro-intestinal and respiratory disorders. At the periodic examination the history shall be updated to include:

- (a) history of frequency and duration of exposure to asbestos since previous examination;

- (b) enquiry for signs and symptoms that may be an early indication of:

- (i) asbestosis, e.g., exertional dyspnea, cough,

- (ii) malignancy, e.g., hemoptysis, pleuritic pain, loss of weight.

(2) Physical Examination: A physical examination is required. Particular attention shall be directed to those systems which may be affected by asbestos, e.g., respiratory and gastro-intestinal systems. The frequency of the periodic examination will depend on the intensity and length of exposure to asbestos and should be decided by the examining physician. It need not be the same for all workers but shall be done at least biennially.

4. Clinical Tests

Clinical tests aid in the assessment of a worker's fitness for exposure to asbestos.

The x-ray and pulmonary function testing facilities shall be engaged in a proficiency testing program with the Occupational Health Branch. The x-rays shall be interpreted by a radiologist or chest physician proficient in reading chest radiographs by the International Labour Office, 1980 Code.

(1) X-rays: A chest x-ray, postero-anterior shall be taken at least biennially during the first 10 years of exposure, and annually thereafter while work exposed. A lateral x-ray is necessary only if required by the examining physician. When exposure is discontinued the frequency of x-rays and the period of surveillance will depend on the intensity and duration of exposure and the findings in previous x-rays. The examining

physician shall determine the duration and frequency of follow-up.

(2) Pulmonary Function Tests: Pulmonary function tests shall be taken in conjunction with the chest x-ray. The instruments shall be calibrated to currently applied standards as published in the "Snowbird Workshop on Standardization of Spirometry", American Review of Respiratory Disease, Vol. 119, 831-838, 1979. The tests shall include FEV<sub>1</sub>, FVC, FEV<sub>1</sub>/FVC% and a mid flow rate such as FEF 25-75%. All relevant data shall be corrected to body temperature and pressure (BTPS).

(3) Action Levels: An assessment of fitness for work shall be based on the clinical examination in conjunction with the clinical tests. For this reason no specific action is stated for the latter. If the examining physician determines that signs of asbestos induced disease are present the worker shall not be removed from asbestos exposure before consultation with the senior chest disease consultant of the Ministry of Labour and a rehabilitation officer of the Workers' Compensation Board (WCB). To qualify for compensation or rehabilitation further assessment by the WCB will be necessary. If asbestos induced disease is confirmed the physician shall then determine whether the worker is fit, fit with limitations or unfit and take action in accordance with section 16 of the asbestos regulation.

##### 5. Health Education

At the pre-placement and periodic examinations all workers shall be advised of the hazard from asbestos and smoking, and their examination results shall be discussed. A worker on leaving employment shall be advised to inform his Family Physician of his previous asbestos exposure whenever he is being examined.

##### 6. Medical History and Examination Records

Under the provisions of the asbestos regulation the examining physician shall

maintain health records for each worker examined. Such records should include:

- name in full of worker;
- maiden surname of mother;
- date of birth;
- sex;
- Social Insurance Number;
- occupations or job titles;
- date occupations or jobs commenced;
- date occupations or jobs ended;
- the kinds of operations or processes in which the worker was involved;
- concentrations of airborne asbestos to which the worker is exposed;
- use of respiratory equipment;
- date of visits to physician's office;
- medical examination reports;
- health assessments;
- results of clinical tests, e.g., chest x-rays and pulmonary function tests;
- copies of referral letter to a hospital or physician;
- copies of Forms 7 and 8 to the Workers' Compensation Board if completed;
- all relevant correspondence concerning health, and any information concerning the actions taken in response to abnormal clinical tests.

A worker's health records shall be kept in a secure place by the examining physician for:

- (a) a period of forty years from the time such records were first made, or
- (b) a period of twenty years from the time the last of such records were made,

whichever is the longer. Where the examining physician or his successor is no longer able or willing to keep the records, the records are to be forwarded to the Chief Physician of the Occupational Health Medical Service of the Ministry of Labour, who will keep them in a secure place.

(a) control includes control in fact, whether through another person or company or otherwise; and

(b) a company or person, other than an individual, shall be deemed to be controlled if, directly or indirectly, a person or company or combination of persons and companies referred to in clauses (a), (b) and (c) of the definition, or any of them, beneficially own, or exercise control or direction over, more than 33% per cent of any class or series of voting securities or participating securities of the company or person.

(4) For the purposes of this Part, a mutual life insurance company licensed under the *Insurance Act* that is incorporated under the laws of Canada or a province or territory of Canada and has its head office in Canada and at least 75 per cent of the directors of which are Canadian citizens ordinarily resident in Canada shall be deemed not to be a non-resident. O. Reg. 345/87, s. 13, *part*.

#### NON-RESIDENT OWNERSHIP

185.—(1) A registered dealer that is not an individual must be a company incorporated, or a person formed or created, under the laws of Canada or a province or territory of Canada.

(2) Subsection (1) does not apply to any international dealer or security issuer. O. Reg. 345/87, s. 13, *part*.

186.—(1) A company or a person, other than an individual, shall not be granted registration or renewal of registration as a dealer if, directly or indirectly, non-residents beneficially own, or exercise control or direction over, more than 50 per cent of any class or series of voting securities or participating securities of the company or person.

(2) If a company that is an applicant for registration or renewal of registration as a dealer is a subsidiary of a parent company, subsection (1) applies in respect of voting securities and participating securities of the parent company rather than the applicant company.

(3) Subsections (1) and (2) do not apply to,

(a) any person or company that is registered as or that applies for registration or renewal of registration as a financial intermediary

dealer, foreign dealer, international dealer, mutual fund dealer, scholarship plan dealer or security issuer;

(b) any dealer that on the 1st day of January, 1987 was a non-resident controlled registrant as defined in paragraph 23 of section 84 or was subject to subsection 133 (2), as those provisions read on that date.

(4) For the purposes of this section, a non-resident does not exercise control or direction over voting securities or participating securities of a dealer that are beneficially owned by another person or company solely by reason of the existence of, or the exercise of rights under, a provision of a shareholders', partnership or other agreement between the non-resident and the other person or company that requires, or has the effect of requiring, the consent of the non-resident to fundamental changes to the constating documents, or in the business and affairs of the dealer or to transactions not in the ordinary course of business of the dealer. O. Reg. 345/87, s. 13, *part*.

187. For the purposes of this Part,

(a) a non-resident who is an individual shall be deemed to own beneficially all of the securities owned beneficially, or over which control or direction is exercised, by any other individual of the opposite sex to whom the non-resident is married or with whom the non-resident is living in a conjugal relationship outside marriage and any relative of the non-resident, or of that other individual, who has the same home as the non-resident; and

(b) if a security is owned by more than one owner and one or more of the owners is a non-resident, the security shall be deemed to be wholly owned by the non-resident. O. Reg. 345/87, s. 13, *part*.

188. The Commission may vary the provisions of this Regulation as they apply to a person or company by designating the person or company to be a non-resident or not to be a non-resident where, in the opinion of the Commission, it is appropriate that the person or company be so designated because of the manner in which the person or company carries on its business. O. Reg. 345/87, s. 13, *part*.

189. The Commission shall not make any designation under section 188 without first giving the registered dealer and the person or company affected an opportunity to be heard. O. Reg. 345/87, s. 13, *part*.

190. No person or company shall be denied registration or renewal of registration as a dealer solely by reason of an agreement entered into before the 30th day of June, 1988 by a non-resident that requires or entitles the non-resident on or after that date to purchase, or to exercise control or direction over, any or all of the voting securities or participating securities of the dealer. O. Reg. 345/87, s. 13, *part*.

## NOTICE OF OWNERSHIP

191.—(1) A registered dealer that knows or has reason to believe that any person or company either alone or in combination with any other person or company is about to acquire, directly or indirectly, beneficial ownership of, or to exercise control or direction over, 10 per cent or more of any class or series of voting securities of the dealer shall forthwith give written notice of such fact to the Commission together with the name of each person and company involved.

(2) A registered dealer that knows or has reason to believe that any person or company either alone or in combination with any other person or company has acquired, directly or indirectly, beneficial ownership of, or is exercising control or direction over, 10 per cent or more of any class or series of voting securities of the dealer shall forthwith give written notice of such fact together with the name of each person or company involved.

(3) Subsections (1) and (2) do not apply to a financial intermediary dealer, international dealer or securities issuer.

(4) Subsection (2) does not apply,

- (a) if notice in respect of the person or company or combination of persons and companies has been given previously under subsection (1); or

The Commission may exempt any person or company from the requirements of any provision of this Part where it is satisfied that to do so would not be prejudicial to the public interest and in granting such exemption the Commission may impose such terms and conditions as are considered necessary. O. Reg. 345/87, s. 13, *part*.

193. Sections 186 and 190 are revoked on the 30th day of June, 1988. O. Reg. 345/87, s. 13, *part*.

## PART XII

## CONFLICTS OF INTEREST

## INTERPRETATION

194.—(1) In this Part,

"connected issuer" means, in respect of a registrant, an issuer that has, or any related issuer of which has, any indebtedness to, or other relationship with, the registrant, a related issuer of the registrant, or a director, officer or partner of the registrant or a related issuer of the registrant, that, in connection

with a distribution of securities of the issuer, is material to a prospective purchaser of the securities;

"designated institution" means a designated institution as defined in section 176;

"influence" means, in respect of a person or company, having the power, directly or indirectly, to exercise a controlling influence over the management and policies of the company or person, other than an individual, or the activities of an individual, whether alone or in combination with one or more other persons or companies and whether through the beneficial ownership of voting securities, through one or more other persons or companies or otherwise;

"networking arrangement" means an arrangement between a registrant (including a financial intermediary dealer) and a financial intermediary (whether or not a registrant) under which the registrant,

- (a) offers for sale or sells to the public a combination of securities and goods or services a portion of which consists of securities, goods or services issued or provided by the financial intermediary, or
- (b) co-operates with the financial intermediary in the joint offering for sale or sale of securities and goods or services, including by paying the financial intermediary or its employees a commission for referring to the registrant a customer or client to whom the registrant sells securities or services,

but does not include trades in, or purchases of, securities of the financial intermediary by the registrant on the same basis on which the registrant trades in the securities of issuers other than financial intermediaries;

"registrant" does not include an officer, partner or salesman of a registrant;

"related issuer" means, in respect of a person or company,

- (a) any other person or company that influences the person or company,
- (b) any other person or company that is influenced by the person or company,
- (c) any other person or company in like relation to a person or company referred to in clause (a) or (b) or any such other person or company, or
- (d) any other person or company designated by the Commission as a related issuer of the person or company in accordance with subsection 195 (1);

"security" includes, in respect of an issuer,

- (a) a put, call, option or other right or obligation to purchase or sell securities of the issuer, and
- (b) a security of any other issuer all or substantially all of the assets of which are securities of the issuer;

"selling group member" means a selling group member as defined in section 176;

"statement of policies" means a statement of policies prepared, revised or amended, and filed with the Commission, under section 198.

(2) For the purposes of the definition of "connected issuer" in connection with a distribution of securities of an issuer, indebtedness of the issuer or any other relationship with the issuer is material to a prospective purchaser of the securities if,

- (a) there is a likelihood that a reasonable prospective purchaser would consider the indebtedness or other relationship important under the circumstances in determining whether to purchase the securities; or
- (b) the indebtedness or other relationship under the circumstances may lead a reasonable prospective purchaser to question whether the registrant and the issuer are independent of each other,

whether or not the indebtedness or other relationship is a material fact.

(3) For the purposes of the definitions of "connected issuer" and "related issuer", an issuer is not a connected issuer of a registrant or a related issuer of a registrant only by reason of the fact that the registrant, acting as an underwriter, owns securities of the issuer in the course of a distribution and in the ordinary course of business of the registrant.

(4) For the purposes of the definition of "influence" in respect of a company or person, other than an individual, any other person or company that, directly or indirectly and whether alone or in combination with one or more other persons or companies, beneficially owns or exercises control or direction over more than 20 per cent of any class or series of voting securities of the company or person, other than an individual, in the absence of evidence to the contrary, shall be deemed to influence the company or person. O. Reg. 345/87, s. 13, *part*.

195.—(1) The Commission may vary the provisions of this Part as they apply to a person or company by designating the person or company to be a related issuer of a registrant where, in the opinion of the Commission, it is appropriate that the person or company be so designated because of the manner in which the person or company carries on its business with the registrant or any related issuer of the registrant.

(2) The Commission shall not make a designation under subsection (1) without first giving the registrant and the person or company affected an opportunity to be heard. O. Reg. 345/87, s. 13, *part*.

#### GENERAL DUTIES

196. Every registrant shall deal fairly, honestly and in good faith with its customers and clients. O. Reg. 345/87, s. 13, *part*.

197.—(1) Every officer, partner, salesman and registered director of a registrant shall deal fairly, honestly and in good faith with the customers and clients of the registrant.

(2) No individual referred to in subsection (1) shall act on behalf of the registrant in connection with any transaction or other act of the registrant that is not in compliance with this Part. O. Reg. 345/87, s. 13, *part*.

#### STATEMENT OF POLICIES

198.—(1) Every registrant shall prepare and file with the Commission a statement of policies that contains,

- (a) a full and complete statement of the policies of the registrant regarding the activities in which it is prepared to engage as an adviser, dealer and underwriter in respect of securities of the registrant and related issuers of the registrant and, in the course of a distribution, of securities of connected issuers of the registrant;
- (b) a list of the related issuers of the registrant that are reporting issuers or that have distributed securities outside Ontario on a basis that, if they had done so in Ontario, would have made them reporting issuers;
- (c) a concise statement of the relationship between the registrant and each of the related issuers of the registrant referred to in clause (b); and
- (d) the following note, or an expanded version of it, in a conspicuous position and in bold face type not less legible than that used in the body of the statement of policies:

The securities laws of the Province of Ontario require securities dealers and advisers, when they trade in or advise with respect to their own securities or securities of certain other issuers to which they, or certain other parties related to them, are related or connected, to do so only in accordance with particular disclosure and other rules. These rules require dealers and advisers, prior to trading with or advising their customers or clients, to

inform them of the relevant relationships and connections with the issuer of the securities. Clients and customers should refer to the applicable provisions of these securities laws for the particulars of these rules and their rights or consult with a legal adviser.

(2) A registrant shall provide to each of its customers and clients, free of charge, a copy of its statement of policies at the time at which the customer or client becomes a customer or client of the registrant or by the 30th day of September, 1987, whichever is later.

(3) In the event of any significant change in the information required to be contained in the statement of policies of a registrant, the registrant shall,

- (a) forthwith prepare and file with the Commission a revised version of, or amendment to, the statement of policies; and
- (b) provide to each of its customers and clients a copy of the revised version or amendment, as the case may be, either,

(i) within forty-five days of the filing, or

(ii) promptly after the first trade by the registrant with or on behalf of the customer or client or the first time at which the registrant acts as an adviser to the client, as the case may be,

whichever is earlier.

(4) Notwithstanding subsection (1), a registrant that does not engage in activities as an adviser, dealer or underwriter in respect of securities of the registrant or of related issuers of the registrant or, in the course of a distribution, in respect of the securities of connected issuers of the registrant, is not required to prepare or file a statement of policies if it files with the Commission a statement that it does not engage in such activities and an undertaking that it will not engage in such activities except in compliance with this Part.

(5) This section comes into force on the 30th day of September, 1987. O. Reg. 345/87, s. 13, *part*.

#### LIMITATIONS ON UNDERWRITING

199.—(1) No registrant shall act as an underwriter or selling group member in connection with a distribution of securities of the registrant or a related issuer or connected issuer of the registrant unless,

(a) the distribution is made by means of a prospectus prepared and filed in accordance with the Act or other document that contains the information required by items 5, 29a and 29b of Form 12; and

(b) in the case of a distribution made by means of a prospectus prepared and filed in accordance with the Act, the portion of the dis-

tribution underwritten by at least one other registrant in respect of which the issuer is not a related issuer or connected issuer is not less than the aggregate of the portions of the distribution underwritten by the registrant and each other registrant in respect of which the issuer is a related issuer or connected issuer.

(2) Clause (1) (a) does not apply in the case of,

(a) a distribution, otherwise than by means of a prospectus prepared and filed in accordance with the Act, in which all of the purchasers are related issuers of the registrant purchasing as principal but not as underwriter; or

(b) a distribution as referred to in clause 71 (7) (b) of the Act.

(3) Clause (1) (b) does not apply to a distribution in which all of the purchasers are related issuers of the registrant purchasing as principal but not as underwriter. O. Reg. 345/87, s. 13, *part*.

#### LIMITATIONS ON TRADING

200.—(1) No registrant, as principal or agent, shall,

(a) trade in securities of the registrant or of any related issuer of the registrant with or on behalf of any customer of the registrant; or

(b) purchase securities of the registrant or of any related issuer of the registrant from or on behalf of any customer of the registrant.

(2) Subsection (1) does not apply if,

(a) before entering into a contract for the sale or purchase of the securities and before accepting payment or receiving any security or other consideration under or in anticipation of any such contract, the registrant makes to the customer a concise statement, either orally or in writing, of the relationship between the registrant and the issuer of the securities;

(b) the customer is,

(i) a fully registered dealer that is trading or purchasing as principal, or

(ii) a related issuer of the registrant that is trading or purchasing as principal; or

(c) the trade is a distribution other than as referred to in clause 71 (7) (b) of the Act. O. Reg. 345/87, s. 13, *part*.

#### CONFIRMATION AND REPORTING OF TRADES

201.—(1) The written confirmation required by subsection 35 (1) of the Act to be sent by a registrant in connection with a sale or a purchase of securities shall,

in the case of a sale or a purchase of securities of the registrant or a related issuer of the registrant, or, in the course of a distribution, of securities of a connected issuer of the registrant, state that the securities are securities of the registrant, a related issuer of the registrant or a connected issuer of the registrant, as the case may be.

(2) If a registrant sends or delivers to a customer or client any report, other than the written confirmation referred to in subsection (1), of any trades in securities that the registrant has made with or on behalf of the customer or client, including any report of trades made by or at the direction of a registrant acting as a portfolio manager, such report shall, in respect of trades in securities of the registrant or a related issuer of the registrant, or, in the course of a distribution, in respect of securities of a connected issuer of the registrant, state that the securities are securities of the registrant, a related issuer of the registrant or a connected issuer of the registrant, as the case may be.

(3) This section comes into force on the 30th day of September, 1987. O. Reg. 345/87, s. 13, *part*.

202.—(1) No registrant shall act as an adviser in respect of securities of the registrant or of a related issuer of the registrant or, in the course of a distribution, in respect of securities of a connected issuer of the registrant.

(2) Subsection (1) does not apply,

(a) in the case of a registrant, acting otherwise than as a portfolio manager, if the registrant, before advising the client, makes to the client a concise statement, either orally or in writing, of the relationship or connection between the registrant and the issuer of the securities;

(b) in the case of a registrant acting as a portfolio manager, if the registrant, before acquiring discretionary authority in respect of the securities and once within each twelve-month period thereafter,

(i) provides the client with the statement of policies of the registrant, and

(ii) secures the specific and informed written consent of the client to the exercise of the discretionary authority in respect of the securities; or

(c) if the client is a fully registered dealer or related issuer of the registrant.

(3) For the purposes of subclause (2) (b) (ii),

(a) a general power to invest in the discretion of the portfolio manager does not constitute specific consent; and

(b) consent is only informed if the portfolio manager believes and has reasonable grounds for believing that it is informed.

(4) This section does not apply to a registrant acting as a portfolio manager until the 30th day of September, 1987. O. Reg. 345/87, s. 13, *part*.

#### LIMITATIONS ON RECOMMENDATIONS

203.—(1) No registrant shall in any medium of communication recommend, or co-operate with any other person in the making of a recommendation, that securities of the registrant or a related issuer of the registrant or, in the course of a distribution, that securities of a connected issuer of the registrant, be purchased, sold or held.

(2) Subsection (1) does not apply to a recommendation in a circular, pamphlet or similar publication that,

(a) is published, issued or sent by the registrant and is of a type distributed with reasonable regularity in the ordinary course of its business;

(b) includes in a conspicuous position, in type not less legible than that used in the body of such publication, a full and complete statement of the relationship or connection between the registrant and the issuer of the securities and of the obligations of the registrant under subsection (1) and this subsection;

(c) includes information similar to that set forth in respect of the issuer of the securities in respect of a substantial number of the other persons or companies that are in the industry or business of the issuer of the securities; and

(d) does not give materially greater space or prominence to the information set forth in respect of the issuer of the securities than to the information set forth in respect of any other person or company described therein.

(3) No registrant shall publish, issue or send any advertisement, notice or other similar publication in respect of securities of a related issuer of the registrant or, in the course of a distribution, in respect of securities of a connected issuer of the registrant, unless the publication states in a conspicuous position in bold face, twelve point type, or such larger type as is required to ensure its prominence in such publication, that the issuer of the securities is a related issuer of the registrant or a connected issuer of the registrant, as the case may be. O. Reg. 345/87, s. 13, *part*.

#### LIMITATIONS ON NETWORKING

204.—(1) A registrant that proposes to enter a networking arrangement with a financial intermediary, at least thirty days before entering the arrangement, shall give written notice to the Director providing all relev-

ant facts to permit the Director to determine if the arrangement makes use of a means of offering for sale or selling securities, goods or services that is inconsistent with an adequate level of investor protection, or if the arrangement,

- (a) is likely to give rise to conflicts of interest; or
- (b) is likely to hinder a registrant in complying with the conditions of registration applicable to it.

(2) If, within thirty days of receipt of a notice under subsection (1), the Director gives a written notice of objection to the registrant, the registrant shall not enter the networking arrangement until the Director approves it.

(3) The registrant, following receipt of a notice of objection under subsection (2), may request the Director to hold a hearing on the matter. O. Reg. 345/87, s. 13, *part*.

205.—(1) This Part, other than sections 196 and 197, does not apply to any trading, purchasing or of advising with respect to, securities referred to in subsection 34 (2) of the Act (so long as registration is not required, except under Part X, to trade in the securities).

(2) Sections 198 to 203 do not apply to a mutual fund dealer.

(3) Sections 199 and 200 do not apply in respect of a

(5) Section 196 and subsection 197 (1) apply to a financial intermediary dealer, an international dealer and a security issuer and their respective directors, officers, partners and salesmen but only in respect of trading in, purchasing of, and advising with respect to, securities. 207. The obligations imposed by sections 196 and 197 on a registrant or any officer, partner, salesman or director of a registrant are not necessarily satisfied solely by virtue of compliance with the other applicable provisions of this Part. O. Reg. 345/87, s. 13, *part*.

208. The Commission may exempt a registrant from the requirements of any provision of this Part where it is satisfied that to do so would not be prejudicial to the public interest and in granting such exemption the Commission may impose such terms and conditions as are considered necessary. O. Reg. 345/87, s. 13, *part*.

14.—(1) Item 5 of Form 12 of the said Regulation is amended by adding thereto the following clause:

- (c) Where the issuer is a related issuer or connected issuer of an underwriter, state a summary of the nature of the relationship or connection between the underwriter and the issuer and state the extent to which the proceeds of the issue will be applied, directly or indirectly, for the benefit of the underwriter or any related issuer of the underwriter. Where the proceeds will not be applied for the benefit of the underwriter or any related issuer of the underwriter, so state. NOTICE IS HEREBY GIVEN that on behalf of The Corporation of the City of Windsor, application will be made to the Legislative Assembly of the Province of Ontario at its next regular session commencing in 1987 for an Act

1. To authorize the passing of by-laws for requiring the erection of screening fences around parking stations and parking lots. A "screening fence" is defined as meaning a berm, a dense evergreen hedge, an ornamental fence of solid construction excluding a chain link or other wire fence, an ornamental wall of concrete brick or stone or any combination thereof.

2.—(1) To establish the "Windsor Licensing Commission" in the place of the Licensing Committee.

(2) The Council may pass any by-law that the Board of Commissioners of Police for the City of Windsor is authorized to pass under the *Municipal Act* or under Section 2 of the *City of Windsor Act, 1972*.

(3) The composition of the Windsor Licensing Commission will be three members, one of whom must be a member of Council.

(4) The Commission may license any trade, calling, business or occupation authorized by by-law of the Council under this or any other Act.

(5) Provision is made for the filling of vacancies, the quorum and election of a chairman and the payment of salaries, expenses and allowances of members of the Commission.

(6) The power granted to license any trade, calling, business or occupation or the person carrying on or engaged in it includes

(a) the power to prohibit the carrying on or engaging in it without a licence;

(b) the power after hearing the licensee to impose conditions on the issuance of a licence or to suspend or revoke a licence; and

(c) the power to regulate or govern any trade, calling, business or occupation or the person carrying on or engaging in it.

(7) The Council may appoint a license commissioner who, upon receipt of an application, shall make all investigations required by law or by Council and if the investigations disclose any reason to believe the applicant is not of good character or that that carrying on of the trade, calling, business or occupation will be likely to result in a breach of the law or be in any way adverse to the public interest, the license commissioner shall recommend to the Commission that it not issue or renew the licence or impose conditions on the issuance of the licence, otherwise the license commissioner may issue or renew the licence.

(8) Where, in the opinion of the license commissioner, the carrying on of a trade, calling, business or occupation by a licensee will likely result in a breach of the law or be adverse to the public interest, the license commissioner shall recommend to the Commission that it suspend, revoke or impose conditions on the licence.

(9) Council may fix license fees and charge penalties for the late payment and may reduce the license fees where the licence is in effect for less than one year.

(10) Council may by by-law authorize the licensing commissioner under specified circumstances to suspend licences for two weeks or until the next meeting of the Commission whichever occurs first.

(11) The decision of the Commission respecting the issuance, renewal, suspension or revocation of a licence is final.

(12) If a by-law passed under this section conflicts with the provisions of any Act, other than the *Municipal Act*, for licensing, regulating or otherwise controlling any business or the person carrying on any business, the provision of that Act prevails to the extent of the conflict.

3. To repeal the sunset clause set out in sub-section 3 (9) of the *City of Windsor Act, 1982 (No. 2)* in order that Council may continue after January 1st, 1988 to designate any improvement area as a demolition control area. Exemption—Vaughan Hydro-Electric  
Commission—VAUG-T-1.

Made—June 5th, 1987.

Approved—June 5th, 1987.

Filed—June 22nd, 1987.

ORDER MADE UNDER THE  
ENVIRONMENTAL ASSESSMENT ACTEXEMPTION—VAUGHAN HYDRO-ELECTRIC  
COMMISSION—VAUG-T-1

Having received a request from the Vaughan Hydro-Electric Commission that an undertaking, namely:

the activity of planning, designing, constructing, operating and maintaining a new electrical

transformer station to transform power from 230 kV to 27.6 kV, on a site located in Lot 7, Concession 3, Town of Vaughan,

be exempt from the application of the Act pursuant to section 29; and

Having been advised by the Vaughan Hydro-Electric Commission that if the undertaking is subject to the application of the Act, the following injury, damage or interference with the persons and property indicated will occur:

A. The public will be interfered with and damaged since the level of service available from the proponent will be diminished and the reliability of the electrical distribution system will be adversely affected if future electrical demands cannot be met.

B. The proponent and its customers will be interfered with by the delay incurred by having to prepare an individual environmental assessment for an undertaking which will not adversely affect the environment.

Having weighed such injury, damage or interference against the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management in Ontario of the environment which would result from the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking is exempt from the application of the Act for the following reasons:

A. The public directly affected by the proposed project have been informed of the proponent's intentions and no concerns have been raised.

B. The need for the project is well documented and information provided shows that environmental impacts will not be adverse; however, in the area of noise impacts, the following conditions will apply to this approval.

This exemption is subject to the following terms and conditions:

1. The Vaughan Hydro-Electric Commission shall provide the Director of the Environmental Assessment Branch of the Ministry of the Environment with a letter indicating the date on which construction commenced, within 30 days following the date, and the letter shall be put on file with the public record kept under section 31 of the Act by the Branch at the Ministry's main office located at 135 St. Clair Avenue West, Toronto, Ontario M4V 1P5.

## ENVIRONMENTAL ASSESSMENT ACT

O. Reg. 369/87.

Exemption—Ministry of Natural

Resources—MNR-52.

Made—June 5th, 1987.

Approved—June 5th, 1987.

Filed—June 22nd, 1987.

### ORDER MADE UNDER THE ENVIRONMENTAL ASSESSMENT ACT

#### EXEMPTION—MINISTRY OF NATURAL RESOURCES—MNR-52.

Having received a request from the Ministry of Natural Resources that an undertaking, namely:

the activity of implementing the Ministry of Natural Resources Cottage Lot Development Program including:

1. The implementation of any

(i) Lake Management Plans

(ii) River Cottaging Plans

2. The provision of road access, access points, common docks and solid waste disposal facilities

3. The disposition of Crown land for cottage development

be exempt from the application of the Act pursuant to section 29; and

Having been advised that if the undertaking is subject to the application of the Act, the following injury, damage or interference with the persons and property indicated will occur:

- A. The public will be interfered with by delay in carrying out management programs to which the Crown has made public commitments and which have no significant negative effects on the environment.

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking is exempt from the application of the Act for the following reasons:

- A. The Ministry of Natural Resources, through public consultation, has developed District Land Use Guidelines which provide direction for determining areas to be considered for cottage development.
- B. The Ministry of Natural Resources has a management planning process for lakes and rivers which considers:
  - (i) development and evaluation of alternative cottage lot and subdivision development plans;
  - (ii) the option of no development;
  - (iii) economic, social and environmental impacts;
  - (iv) public consultation;
  - (v) input from other government agencies;
  - (vi) periodic reviews of lake and river management plans.
- C. The Ministry of Natural Resources processes Crown land subdivision development plans in accordance with procedures for private land subdivision proposals established under section 50 of the *Planning Act, 1983*.
- D. The cottage lot program provides a service to the people of Ontario in areas where this demand is not now fulfilled by the private sector.
- E. No significant negative environmental impacts or other public concerns have been identified with the cottage lot program which was carried out between 1974 and 1982.
- F. The exemption will provide for early implementation of Ministry of Natural Resources Northern Competitiveness Initiatives to increase the use of Crown land as a development tool. A market demand study for cottage lots in Northern Ontario being carried out by the Ministry of Natural Resources during the term of this exemption will provide the long term direction for the Cottage Lot Development Program. The results of this study will also allow for an accurate determination of future methods for complying with the *Environmental Assessment Act*.

The exemption is subject to the following terms and conditions:

- 1. The Cottage Lot Development Program will be carried out in accordance with:
  - 1. The Ministry of Natural Resources

"Interim Lake Planning Guidelines", 1977;

- 2. The Ministry of Natural Resources "River Cottageing Guidelines", 1982;

- 3. The Ministry of Natural Resources "Policy for Cottage Lot Development Program" dated March 11, 1987,

as amended from time to time and shall only include activities carried out for the purposes of creating, developing and servicing lots referred to in condition 10.

- 2. New cottage lots shall only be created in accordance with the procedure under section 50 of the *Planning Act, 1983*, as amended from time to time, which, for purposes of this order, shall be treated by the Ministry of Natural Resources as though the Act bound the Crown.
- 3. The Ministry of Natural Resources shall provide the Environmental Assessment Branch of the Ministry of the Environment and the Strategic Policy Branch of the Ministry of Tourism and Recreation with a list of existing MNR approved lake and river plans related to this undertaking which are intended to be implemented during the term of this order, within six months of the approval of this exemption order.

Any amendments to this list will be forwarded to the Director of the Environmental Assessment Branch, Ministry of the Environment within thirty days of the list being amended by the Minister of Natural Resources. The names of lakes and rivers for which new plans will be formulated will also be forwarded to the Director of the Environmental Assessment Branch, Ministry of the Environment, prior to the commencement of the lake and river planning process.

- 4. A copy of each lake and river plan, once it is approved by MNR, shall be made available to the public for examination at the appropriate District Office of the Ministry of Natural Resources at least forty-five days before implementation commences and, in any event, prior to the submission of a draft plan of subdivision or the commencement of construction of an access road, access point, common dock or solid waste disposal facility. A summary of each plan to be implemented will be forwarded to the Environmental Assessment Branch of the Ministry of the Environment and the Strategic Policy Branch of the Ministry of Tourism and Recreation no later than the date the plan is required to be made available at the District Office to be kept with the records of environmental assessments and made avail-

able to the public in the same way as these records.

5. Where the Minister of the Environment determines, after consultation with the Minister of Natural Resources, that a proposed activity,

- (a) may generate an unusual amount of public or Government concern;

- (b) may have unusual or significant potential environmental impacts not adequately treated in the pertinent planning exercise; or

- (c) would otherwise warrant an environmental assessment,

the Minister of the Environment may, by written notice to the Minister of Natural Resources, direct that an environmental assessment be prepared for the activity in which event the activity will not be exempt under this Order.

6. Where the Minister of the Environment has given written notice to the Minister of Natural Resources that he is considering the application of condition 5 to an activity, MNR shall not implement the activity until forty-five days have elapsed from the giving of notice or the Minister of the Environment gives written notice to the Minister of Natural Resources that it is not proposed to require an environmental assessment.

7. The Ministry of Natural Resources as part of its Lake and River Planning Process shall comply with the conditions of approval of the Class Environmental Assessments for Access Points and Docks and Access Roads to MNR facilities approved on April 1, 1982 and the Class Environmental Assessment for Solid Waste Disposal approved on April 6, 1984 or any subsequent approval that is provided for the undertakings described in these Class Environmental Assessments.

8. Where an environmental assessment is submitted for a lake or river plan, that plan shall be deemed to be a separate undertaking not exempt by this order.

9. During the term of this exemption, the Ministry of Natural Resources shall conduct a review of the Interim Lake Planning Guidelines and the River Cottaging Guidelines to ensure that these guidelines take into account the concerns of government ministries and agencies. These guidelines

shall be circulated by the Ministry of Natural Resources for review to all those government ministries and agencies which are normally involved in the Government Review under the *Environmental Assessment Act*.

10. The Ministry of Natural Resources shall offer no more than 350 new Crown lots under this exemption order to the public in each year of the term of this Order.

11. Each lot developed by the Ministry of Natural Resources under this Cottage Lot Program shall be able either in a natural or an engineered state to support a Class 4 sewage system.

12. The Ministry of Natural Resources, in consultation with the Ministry of the Environment, shall determine the most appropriate method for long term compliance with the *Environmental Assessment Act* for this program and shall submit a letter to the Director of the Environmental Assessment Branch by June 30, 1988 which outlines an agreement satisfactory to the Ministry of the Environment.

13. A copy of this guidelines and policy referred to in condition 1, the list and its amendments referred to in condition 3, the summary referred to in condition 4, any notice referred to in condition 5, 6 or 14 shall be kept in the public records maintained under section 31 of the Act by the Environmental Assessment Branch.

- 14.—(1) If the Ministry of the Environment has not issued a notice in writing to the Minister of Natural Resources referring to this sub-condition by the 15th day of July, 1988 stating that the agreement referred to in condition 12 is satisfactory, this Exemption Order shall expire on that date.

- (2) Subject to subsection (1), this Order expires December 31, 1988 except that the Minister of the Environment, taking into consideration but no limited to the agreement referred to in condition 12 made on the long term application of the *Environmental Assessment Act* to this program and upon request of the Minister of Natural Resources, may by written notice referring to this condition extend the expiry date but this extension shall not be beyond June 30, 1990. O. Reg. 369/87.

Dated this 5th day of June, 1987.

## PART IX

## TAKE-OVER BIDS AND ISSUER BIDS

## 163.—(1) In this section,

"formal valuation" means a valuation prepared by a qualified and independent valuer based upon techniques that are appropriate in the circumstances, after considering going concern or liquidation assumptions or both, together with other relevant assumptions, that arrives at an opinion as to a value or range of values for the participating securities based upon such analysis without any downward adjustments to reflect the fact the participating securities do not form part of a controlling interest;

"going private transaction" means an amalgamation, arrangement, consolidation or other transaction proposed to be carried out by an insider of an issuer as a consequence of which the interest of the holder of a participating security of the issuer in that security may be terminated without the consent of that holder and without the substitution therefor of an interest of equivalent value in a participating security of the issuer or of a successor to the business of that issuer or of another issuer that controls the issuer but does not include the acquisition of participating securities pursuant to a statutory right of acquisition;

"insider" means,

- (a) every director or senior officer of an issuer,
- (b) every director or senior officer of a company that is itself an insider or subsidiary of an issuer,
- (c) any person or company who beneficially owns, directly or indirectly, voting securities of an issuer or who exercises control or direction over voting securities of an issuer or a combination of both carrying more than 10 per cent of the voting rights attached to all voting securities of the issuer for the time being outstanding other than voting securities held by the person or company as underwriter in the course of a distribution, and
- (d) an issuer where it has purchased, redeemed or otherwise acquired any of its securities, for so long as it holds any of its securities;

"insider bid" means a take-over bid made by an insider of the offeree issuer or by any associate or affiliate of an insider of an offeree issuer;

"participating security" means a security that carries the right to participate in earnings to an unlimited degree including a security that by its terms is convertible into or exchangeable for or carries the right to purchase such a security;

"prior valuation" means an existing independent apprai-

sal or valuation or any material non-independent appraisal or valuation in respect to an issuer, its material assets or its securities.

(2) Every take-over bid circular and issuer bid circular to which this section applies shall contain, except where the offeror establishes to the Director's satisfaction that the offeror lacks access to information enabling the offeror to comply with this subsection, and subject to any waiver or variation consented to in writing by the Director,

- (a) a summary of a formal valuation of the offeree issuer;
- (b) an outline of every prior valuation of the offeree issuer made within twenty-four months preceding the date of the take-over or issuer bid including a description of the source and circumstances under which it was made.

(3) This section applies only to,

- (a) a take-over bid circular that is required by the Act in respect of an insider bid;
- (b) a take-over bid circular that is required by the Act where it is anticipated by the offeror that a going private transaction will follow the take-over bid; or
- (c) an issuer bid circular that is required by the Act.

(4) Subject to subsection (5), a formal valuation referred to in clause (2) (a) shall be as of a date that is not more than 120 days before the date of the take-over bid or issuer bid and shall contain appropriate adjustments for material intervening events.

(5) A formal valuation referred to in clause (2) (a) may be as of a date that is more than 120 days before the date of the take-over bid or issuer bid if it is accompanied by a letter addressed to the directors of the issuer confirming that the valuer has no reasonable ground to believe that any intervening event has materially affected the value or range of values determined in such valuation or, if there has been such an event, describing it and stating the resultant change in the value or range of values in the valuation.

(6) Where the Director is of the opinion that disclosure of information required by subsection (2) to be furnished to the holders of securities would cause a detriment to the offeree issuer or the security holders of the offeree issuer that would outweigh the benefit of the information to the prospective recipients, the Director may permit the omission of the information.

(7) A formal valuation referred to in clause (2) (a) and a letter of confirmation, if any, referred to in subsection (5), shall be filed concurrently with the filing of the circular in which reference to the valuation is made except

where the Director otherwise permits. O. Reg. 374/87, s. 3, *part.*

164.—(1) For the purposes of Part XIX of the Act, "market price" of a class of securities, as to which there is a published market, at any date, is an amount equal to the simple average of the closing price of securities of that class for each of the business days on which there was a closing price falling not more than twenty business days before that date.

(2) Where a published market does not provide a closing price, but provides only the highest and lowest prices of securities traded on a particular day, the market price of the securities, at any date, is an amount equal to the average of the simple averages of the highest and lowest prices for each of the business days on which there were highest and lowest prices falling not more than twenty business days before that date.

(3) Where there is more than one published market for a security, the market price for the purposes of subsections (1) and (2) shall be determined as follows:

1. If only one of the published markets is in Canada, the market price shall be determined solely by reference to that market.
2. If there is more than one published market in Canada, the market price shall be determined solely by reference to the published market in Canada on which the greatest volume of trading in the particular class of securities occurred during the twenty business days preceding the date as of which the market price is being determined.
3. If there is no published market in Canada, the market price shall be determined solely by reference to the published market on which the greatest volume of trading in the particular class of securities occurred during the twenty business days preceding the date as of which the market price is being determined.

(4) Where there has been trading of securities in a published market for fewer than ten of the twenty business days preceding the date as of which the market price of the securities is being determined, the market price shall be the average of the following prices established for each of the twenty business days preceding that date,

- (a) the average of the bid and ask prices for each day on which there was no trading; and
- (b) the closing price of securities of the class for each day that there has been trading, if the published market provides a closing price; or
- (c) the average of the highest and lowest prices of securities of that class for each day that there has been trading, if the published market provides only the highest and lowest

prices of securities traded on a particular day.

(5) Notwithstanding subsection (1), (2), (3) or (4), for the purposes of clause 92 (1) (b) of the Act, where an offeror acquires securities on a published market, the market price for those securities shall be the price of the last board lot of securities of that class purchased, before the acquisition by the offeror, by a person or company that was not acting jointly or in concert with the offeror. O. Reg. 374/87, s. 3, *part.*

165. A take-over bid is exempt from sections 94 to 99 of the Act for securities in respect of which there is no published market if,

- (a) purchases are made from not more than five persons or companies in the aggregate, including persons or companies outside of Ontario; and
- (b) the bid is not made generally to security holders of the class of securities that is the subject of the bid. O. Reg. 374/87, s. 3, *part.*

166.—(1) Subsection 93 (2) of the Act is not applicable to an agreement between a security holder and an offeror to the effect that the security holder will tender the security holder's securities to a formal take-over bid made by the offeror in accordance with the terms and conditions of the bid.

(2) Subsection 93 (8) of the Act does not apply to prohibit the issue of securities by an issuer pursuant to a stock dividend plan, dividend reinvestment plan, employees' stock purchase plan or other similar plan, notwithstanding that the issuer is making an issuer bid.

(3) For the purpose of clause 93 (1) (c) of the Act, an associate of a security holder referred to in that clause does not include a person or company who is not acting jointly or in concert with the security holder. O. Reg. 374/87, s. 3, *part.*

167. Subsection 93 (5) of the Act does not apply so as to affect the consideration offered or the number of securities offered to be acquired under a formal take-over bid where the prior transaction was an acquisition pursuant to a distribution as defined in subparagraph (i) or (ii) of paragraph 11 of subsection 1 (1) of the Act. O. Reg. 374/87, s. 3, *part.*

168.—(1) A notice of intention to make an issuer bid as required by clause 92 (3) (f) of the Act shall contain the information prescribed in Form 31.

175a.—(1) No variation in the terms of a bid may be made after the expiry of the deposit period, except the waiver by the offeror of a condition that is specifically stated in the bid as being waivable at the sole option of the offeror.

(2) Section 97 of the Act does not apply so as to require a notice of variation with respect to a waiver referred to in subsection (1) after the deposit period where the consideration offered for the securities that are subject to the bid consists solely of cash, but a press release with respect to the waiver must be issued within five days after the deposit period.

(3) In this section, "deposit period" means the period, including any extension, during which securities may be deposited pursuant to the bid. O. Reg. 374/87, s. 3, *part*.

1. To authorize the passing of by-laws for requiring the erection of screening fences around parking stations and parking lots. A "screening fence" is defined as meaning a berm, a dense evergreen hedge, an ornamental fence of solid construction excluding a chain link or other wire fence, an ornamental wall of concrete brick or stone or any combination thereof.

2.—(1) To establish the "Windsor Licensing Commission" in the place of the Licensing Committee.

(2) The Council may pass any by-law that the Board of Commissioners of Police for the City of Windsor is authorized to pass under the *Municipal Act* or under Section 2 of the *City of Windsor Act*, 1972.

(3) The composition of the Windsor Licensing Commission will be three members, one of whom must be a member of Council.

(4) The Commission may license any trade, calling, business or occupation authorized by by-law of the Council under this or any other Act.

(5) Provision is made for the filling of vacancies, the quorum and election of a chairman and the payment of salaries, expenses and allowances of members of the Commission.

ENVIRONMENTAL ASSESSMENT ACT

O. Reg. 411/87.  
Exemption—Ministry of the Environment—  
MOE-33.  
Made—June 30th, 1987.  
Approved—June 30th, 1987.  
Filed—July 10th, 1987.

ORDER MADE UNDER THE  
ENVIRONMENTAL ASSESSMENT ACT

EXEMPTION—MINISTRY OF THE  
ENVIRONMENT—MOE-33

Having received a request from the Regional Director, Central Region, Ministry of the Environment, that an undertaking, namely:

The removal of lead contaminated soil from residential and municipal properties in the vicinity of the Canada Metal Company Limited secondary lead smelter on Eastern Avenue in Toronto, hauling the soil to approved waste disposal sites, replacing it with uncontaminated top soil and restoring the properties to a condition approximating that which existed prior to the soil removal

be exempt from the application of the Act pursuant to section 29; and

Having been advised by the Regional Director, Central Region, that if the undertaking is subject to the application of the Act, the following injury, damage or interference with persons and property indicated will occur:

- A. Since lead contaminated soil on residential and municipal properties poses a potential hazard to the health of pre-school aged children, there will be a prolonged exposure of these children to the potential hazard.

- B. The public will become increasingly uneasy over the continuing presence of lead contaminated soil in view of its potential hazard to pre-school aged children and the Ministry commitment to remove it.

Having weighed such injury, damage or interference against the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management of Ontario of the environment which would result from the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking is exempt from the application of the Act for the following reasons:

- A. The lead contaminated soil poses a potential hazard to the children of the area. Delays which would be engendered by the application of the Act to the removal program will add to the duration of this potential hazard. Therefore, it is in the public interest to replace lead contaminated soil in the area expeditiously without waiting for an environmental assessment approval.

The exemption is subject to the following terms and conditions:

1. The Ministry, where appropriate, shall inform and consult with agencies, municipalities,

public groups and the public, which have concerns with the undertaking before the commencement of the undertaking.

2. The Director, Central Region, Ministry of the Environment, shall advise, in writing, thirty calendar days after the completion of the undertaking, the Director of the Environmental Assessment Branch of the Ministry of the Environment, as to how the conditions of the exemption have been met, for filing with the public records kept under section 31 of the Act by the Branch at the Ministry's main office.
3. The Director, Central Region, shall designate specific truck haulage routes to be followed throughout the undertaking, in order to minimize any potential adverse effects on local residents.
4. The Director, Central Region, Ministry of the Environment, shall take steps to ensure that the hauling contractor securely contains all loads in order to prevent spillage and cleans up any spillage that does result from the loading and hauling of the soil. O. Reg. 411/87.
